

Since 1976, Diversified Plastics Inc. (DPI) has been a leading rotational molding manufacturer of custom and standard material handling carts and plastic storage containers.

DPI specializes in material handling carts for a wide range of industries, including textiles, hospitality, laundry, agricultural, marine and more. Manufactured at the company's headquarters in Latta, S.C. and facility in Union Point, Ga., which feature state-of-the-art rotational molding equipment and in-house metal fabrication shops, DPI's diverse product line is able to accommodate any application.

DPI's capabilities extend far beyond the typical material handling solutions. The company's production facilities can also accommodate custom request to meet even the most unique of needs.

DPI Waste and Recycling Plastic Containers are a sustainable option for the waste and recycling industries. Lightweight, durable, and low-maintenance, these containers deliver superior functionality and aesthetics compared to traditional steel and aluminum dumpsters.

MARKET-SPECIFIC BENEFITS

High-Visibility Applications

Provides branding opportunities by offering on-container advertising in highly visible locations, including sports venues, stadiums, restaurants, apartment and condominium complexes, and corporate offices.

Municipalities

Provides a quiet, longlife waste container that maintains a new appearance throughout its lifetime. Durable polymer construction lowers maintenance costs due to its resistance to corrosion and graffiti.

Organic Waste/Recycling

Offers restaurants, food processing plants, and residential areas the capability to separate waste streams in a safe and durable container that is resistant to corrosive substances.

Waste Haulers

Provides a quiet, lightweight container that is less hard on equipment than steel and aluminum containers. Its non-corrosive construction eliminates leakage, preventing groundwater contamination while lowering maintenance costs by preventing frequent repair.

Consumer/Big Box Stores

Allows consumer-oriented businesses to provide customers with a lightweight and durable waste receptacle suitable for use during home remodeling and construction projects.

CONSTRUCTION

- One-piece molded construction improves durability and strength performance
- No refurbishing required
- Double-walled components improve overall performance and handling
- Easy to clean—resistant to UV rays, chemicals, saltwater, and petroleum-based liquids
- Improved safety characteristics with no sharp edges
- Quiet pickup and disposal, allowing neighborhood-friendly drop-offs and collection in noise-sensitive areas

AESTHETICS

- Rust resistant
- Customizable colors are resistant to fading while concealing effects from daily wear and tear
- Smooth exterior provides advertising and branding space for graphics and logos
- Easy to keep clean and maintain a polished surface — resistant to UV rays, saltwater, and most chemicals
- Improved public perception of waste containers over time

PORTABLE

- Improved weight reduction—one-third less weight compared to steel containers
- Stackable for improved shipping

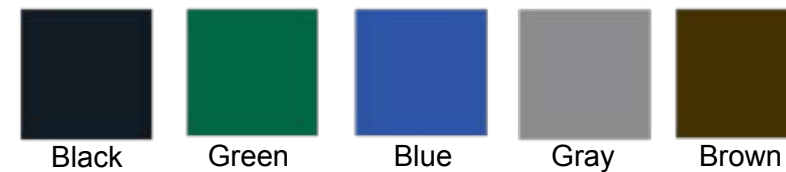

SUSTAINABLE

- Made with 100% recyclable, FDA-approved polyethylene plastic
- Environmentally friendly when compared to steel containers

PRODUCT SPECS

Model	Capacity	Width	Depth	Height	Weight
2 Yard 	2,000 lbs	86"	51"	48"	205lbs
4 Yard 	3,500 lbs	86"	61"	61"	368lbs
6 Yard 	4,000 lbs	85.5"	64.75"	86.75"	492lbs
